

## The Gold Standard of Recycled Rubber

- Easy installation for maintenance-free landscaping
- Made from environmentally-friendly materials approved by the EPA
- Long-lasting and durable, will not freeze or crack
- Grooved bottom channels water off of the surface
- Made from 100% recycled rubber
- Made in the USA
- Size: 16" x 16" x 3/4"
- Available in Brown, Red, and Gray

# Rubberific Dual-Sided Pavers

Made from 100% recycled rubber, our full line of Rubberific Pavers take only minutes to install for years of maintenance-free beauty. Bring new life to old patios, decks and floors with these durable and long-lasting rubber pavers. If you are looking for flexibility in design, choose our dual-sided 16-inch reversible pavers with a brick pattern one side and an architectural pattern on the other.

## Installation Instructions:

- Thoroughly clean the surface where the pavers are to be installed. Allow to dry completely. Make sure that both paver and surface have no moisture on them for best adhesion.
- Place the paver on surface to assure you have the proper amount and that you like the overall design.
- To achieve the best result, snap chalk lines as a guide and pavers will be straight during installation.
- Begin installation in a corner or against a wall and work in small section.
- Apply a polyurethane adhesive to the bottom of the paver and place on the surface.
- Gently tap tiles into place with a rubber mallet for adhesion to surface. Continue this process until you have successfully glued all pavers to your surface.
- For any pavers that require cutting, use a razor knife. Cutting the paver in a series of scores to acquire a clean edge.
- Allow the area to dry for a minimum of 24 hours before use.

*Note: After installation some natural weathering of pavers may occur. If attaching to a wood surface, you may also use a one inch staple instead of polyurethane adhesive.*
